Regular, Inline & Extrude (stacked under Regular), 16/20pt

Rocher was designed while looking for an answer to a simple question: what would a typeface look like if it was made of stone? Unexpected corners provide just the right amount of roughness, while unusual letterforms give the text an informal aesthetic, traces of something naive and handmade. Rocher consists of 9 stackable fonts, each one containing 421 glyphs and supporting over 200 languages.

Jewel, Regular, Bevel B & Extrude, 24/24pt

Rocher é uma tipografia inspirada em pedras. Seu desenho é orgânico e cheio de quinas, resultando em uma aparência bruta porém ingênua. Cada uma de suas 9 fontes empilháveis contém 421 glifos e suporta mais de 200 idiomas.

Specimen designed by Plomo71.
September 2017. Printed in Brazil.
